One suction
One electrical pump of 1.5 HP
Pressure control knob
Rs. 55175

where quality is priority..

Whirlpools represent one of the simplest and most intelligent additions to your home for the health conscious era.

This is the combined action of two factors: Water pressure and Air induction.

Air is drawn into the system and discharged as micro bubbles which break all over the skin, like a massage carried out by many tiny fingers.

Total immersion and a massage of this kind, stimulates the muscles and skin tissue.

In an ordinary bath, water hugging the body is soon cooled by the body temperature. But in a whirlpool, the circulation water maintain it's temperature due to friction of water with inner surface of pipes.

Fluid movement to the blood is encouraged from joints and tissues, allowing toxins to be neutralized and stress hormone levels to be diluted. The effect of weightlessness is also significant, causing muscles to relax and allowing the blood to flow more easily.

Research into hydro massage has found it beneficial in the treatment of gout, kidney disorders, diabetes and rheumatism and for treating pressure-related pain, such as backache, joint disease and bone fractures.

Shower Tray

- Subject to Ahmedabad Jurisdiction.

BATH TUBS

In 1979 at the age of 22 when I decided to start manufacturing Bath Tubs, elders and friends were apprehensive. Tough product, super luxurious category, limited market. But I was determined. With dedication, guidance and support, I began my journey. These 37 years have given me immense work satisfaction and feeling of accomplishment. No matter what, against all odds, I have remained faithful to the product; with end-user's comfort as my only priority. Sincere efforts to extend best services and the drive to succeed with integrity has brought Expo to this level today. I'm indebted to the encouragement from my customers, architects, hotel owners and housing organisers by approving Expo as their valued product.

I assure continued sincerity for offering customer-friendly products.

– Rajesh Shah
